We particularly call the attention of our Friends to the above of domestic manufacture. It must be evident to every one that it is to the advantage of the country that as little of our money as possible should go into the hands of the Foreign manufacturer; and with this view, we have always given all the encouragement in our power to home productions, and have made every effort to introduce them among our customers, ceasing entirely to import from England or elsewhere goods that the Canadian can at all come near, as we practically know that, taking strength and soundness as the criterion, they are

unequalled by any Foreign manufacture at the price; and in point of style are coming every year nearer the standard of the old production, and many of the goods enumerated above will compare in style favourably with the bulk of Scotch Tweeds.

FLANNELS, &C.

HOSIERY.

We always keep a very Complete Stock of Goods *for all seasons* in this Department, and confidently recommend it to our correspondents as being now as full as usual. Of course, neither in this nor any other Department do we pretend to give a complete list of every item therein. Our purpose is more to give our friends an idea of the general completeness of the assortment than a list of everything we keep.

Womens', and O. S. Womens',

FIRST
DIRECT IMPORTATION OF TEAS FROM CHINA
TO
CANADA WEST.

THE unparalleled advance in the price of TEAS has forced upon us the necessity of, as far as possible, avoiding every profit on the article between the producer and our customer. With this view, we have now a shipment on the way from China direct, which we hope to have in store by the time this book reaches your hands.

OCCUPIERS OF LANDS IN UPPER CANADA.

The number of occupiers of lands in Upper Canada was 131,983 in 1860, and 99,996, in 1851—an increase of 32,077, or a little over 32 per cent. This was considerably less than the percentage of the increase of the whole population, which was 463. It is a singular circumstance that the number of very small landholders diminished considerably between 1851 and 1860. In the former year there were 12,417 occupiers of twenty acres and under, and in the latter year there were but 7,099 of this class. The number who held between 20 and 50 acres was 19,143 in 1851, and 26,630 in 1860; the number who held from 50 to 100 acres increased from 47,427 to 61,891; the number who held from 100 to 200 acres increased from 17,515 to 23,336; and the number who held above 200 acres increased from 3,404 to 5,027. The whole of the lands held in Upper Canada were 13,354,907 acres in 1860, against 9,825,915 in 1851—

ers diminished
417 occupiers
9 of this class,
and 26,630 in
to 61,891; the
336; and the
whole of the
915 in 1851—

an increase of 3,528,992 acres, or nearly double the corresponding increase in Lower Canada. The following are the counties in which the greatest increase in the quantities of land held has taken place. In Kent the increase was from 216,422 acres to 316,222; in Lambton, from 167,969 to 291,803; in Victoria, from 160,190 to 292,765; in Simcoe, from 530,103 to 466,624; in Wellington, from 358,949 to 532,671; in Huron, from 231,037 to 632,324, an increase of 348,287 acres; in Grey, from 217,319 to 555,697, an increase of 338,378 acres; and in Bruce from 35,643 to 477,882, an increase of not less than 442,239 acres. The county in which the smallest quantity of land is held is Russell, which has also the smallest population of any county in Upper Canada—its population being 6,824 and its occupied acreage, 73,715. The county in which the largest quantity of land is held is Huron, which has also the largest population of any county in Upper Canada [excepting York]—its population being 51,951 and its occupied acreage 632,324.

PRODUCTION OF WHEAT---It is an error to suppose that ours is the greatest wheat-producing country. We do our full share, without doubt, but our system of agriculture lasteasily exhausting our best lands, and in a few years a diminution of the yield will be apparent in our census returns. Last year's crop is assumed to be 180,000,000 bushels, but the average is probably only 120,000,000. The average yield of other countries is as follows: France, 191,422,248; Britain, 145,800,000; Two Sicilies, 61,000,000; Canada, 60,000,000; Spain, 46,470,184; Austria, 28,735,568; Sardinia, 19,975,000; Russia, [export, only] 18,921,776; Belgium, 13,350,000; Portugal, 5,500,000; Turkey [exports only] 4,629,000; Holland, 3,600,000; Denmark, 3,000,000; Sweden and Norway, 1,200,000. Here is an annual production of over 606,000,000 bushels. If the crops of this continent are included, the total may be safely assumed to be 900,000,000, as the unascertained product of Russia and Turkey must be very

large. No better evidence of the primary value of the wheat plant to the human family could be given than at an exhibition such as this. It proves that where the highest civilization has been attained, there the greatest production is realized.

COFFEE—The consumption of coffee is estimated in the following manner: The whole of North America consumes 337,500,000 lbs., being in the largest proportion, France, Switzerland, Spain, Italy, Portugal, and adjoining islands, consume amongst them only 202,500,000 lbs.; Germany, including Austria, 292,500,000 lbs.; Holland and Belgium, 142,500,000 lbs.; Denmark, Sweden, Russia, Finland and Poland, only 75,000,000 lbs. among them, owing probably, to the fondness of those nations for something stronger. Great Britain and Ireland consume about 60,000,000 lbs.

DISCOVERIES OF THE MICROSCOPE.—Leuwenhoeek tells us of animated insects seen with the microscope, of which twenty-seven millions would only be equal to a mite. Insects of various kinds are observable in the cavities of a common grain of sand. Mold is a forest of beautiful trees, with its branches, leaves, flowers, and fruit fully discernible. Butterflies are fully feathered. Hairs are hollow tubes. The surface of our bodies is covered with scales like a fish; a single grain of sand would cover one hundred and fifty of these scales; and a single scale covers five hundred pores yet through these narrow openings the perspiration exudes like water through a sieve—how minute must be its particles! The mite makes five hundred steps in a second! Each drop of stagnant water contains a world of animated beings, swimming with as much liberty as whales in the sea. Each leaf has a colony of insects grazing on it like an ox in a meadow.

THE UPS AND DOWNS OF WHEAT.—Mr. G. Wren Hoskyns writes to the Times: "For no less a period than thirty-two years, ever since 1827, the price of wheat has moved in quadrennial periods—four years up and four years down—with a regularity so steady and invariable that it is difficult to cast one's eyes over the scale of annual averages and escape the impression it conveys of a perfect natural cycle. No expansion into verbal statement will do justice to the expressive tale which the diagram of annual prices affords to the eye. Briefly told, however, and omitting fractional figures, it is as follows: From 1827 to 1831, the first quadrennial period, the price of wheat rose from 58s in the first named year to 66s in the last. Thence to 1856 it fell by regular annual steps, 58s, 22s and 46s to 39s. In the next four years it rose again

with equal regularity, through 48, 55s, and 64s to 70s in 1839. Then down, by the graduations of 66s, 64s, and 57s, to 50s in 1843. Up again through 50s, 51s, and 54s to 69s in 1847. Down again in turn, by the regular stages of 50s, 44s, 40s to the figure fearful to agricultural eyes of 38s, in 1851. The next four years it mounted again by the encouraging degrees of 41s, 53s, 72s, to the crinean altitude of 74s in 1855; whence it has declined, in obedience to the same singular law of succession to 69s and 56s in 1856 and 1857, and to the still lower figure it holds in the year just expired, the third, and happily the penultimate of our present descending series.

Manchester, in England, is the greatest manufacturing city in the world. In its factories and foundries there is employed, daily, a motive steam power equal to that of 1,200,000 horses. This requires 30,000 tons of coal for raising steam, which amounts to 9,200,000 tons per annum.

BIRTHS, MARRIAGES AND DEATHS.---During the last fifteen years, that is to say since 1845, 9,178,631 births, 6,163,403 deaths, and 2,285,520 marriages have been officially registered in England and Wales. The population, which amounted to about 16,720,000 in 1845, was estimated at about 19,740,000 in 1859, being an increase of about 18.06 per cent, or 1.20 per cent annually. This increase, it should be remembered, has taken place, notwithstanding a considerable emigration and several wars of more or less magnitude. In France the population, notwithstanding a comparatively feeble emigration, has only increased in the same period from 3 to 4 per cent.

Not to hear conscience is the way to silence it.

POST OFFICE DEPARTMENT.

GENERAL POST OFFICE.

Postmaster General, Hon. M. H. Foley; Deputy Postmaster General, Wm. H. Griffin; Accountant, H. A. Wicksteed; Secretary, Wm. White; Cashier, John Ashworth; Superintendent Money Order Branch, P. Lesner. Clerks of the First Class—R. M. Julian, E. C. Hayden, J. T. McNaig, R. Oliver, D. Lawson, H. S. Wetherley, P. Hol, J. C. Stewart. Clerks of the Second Class—J. Audette, C. R. McKenzie, J. Brophy, Geo. J. Mason. Clerks of the Third Class—J. Boyd, J. L. McMahon, E. H. Benjamin, Wm. D. LeSueur, B. King, G. H. Fargave, J. J. Garren, G. H. Holt, R. W. Barker, H. W. Gault, Clerks of the Fourth Class—W. Berry, T. J. Holloway, O. Frechette, R. P. Davis, J. Wilson.

Inspection Branch—John Dewe, G. E. Griffin, M. Sw. Laram, Edwd. F. King, W. G. Sheppard, Francis Clemow, and John Ogle R. Adams.

LETTER RATES.

Letters posted in Canada addressed to any place within the Province pass, if prepaid, for 5 cents per $\frac{1}{2}$ oz., but if posted unpaid such letters are charged 7 cents per $\frac{1}{2}$ oz.

On letters to Nova Scotia, New Brunswick, and Prince Edward's Island, the rate is 5 cents per $\frac{1}{2}$ oz., with optional prepayment.

The rate on Letters to the United Kingdom is, by Canadian Packet,

Not exceeding $\frac{1}{2}$ oz.	12 $\frac{1}{2}$ cents.
Exceeding " and not exceeding 1 oz.	25 "
1 oz. and not exceeding 2 oz.	50 "

and so on, increasing two rates of postage for each additional ounce.

And by Cunard Packet, 17 cents per $\frac{1}{2}$ oz., etc.

Letters for the United Kingdom must be prepaid, or they will be charged a fine of 6d. sterling on delivery.

Letters for British Colonies and possessions beyond Sea, and Foreign Countries, via England, must be prepaid.

The rate on letters for the U. States, (except California and Oregon)	10 cents per $\frac{1}{2}$ oz.
" " for California and Oregon	15 "
" " to Cuba	20 "

The Postage rate to British Columbia is,

Letters	25 cents per $\frac{1}{2}$ oz.
New-papers	2 cents each.

MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz: a Canadian Packet on every Thursday, via Derry on Friday, sailing to Quebec in summer and Portland in winter, by which the Postage rate is 6d. stg. per $\frac{1}{2}$ oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada, alternately to Boston and New York, by which the Postage rate to Canada is 8d. stg. per $\frac{1}{2}$ oz.

The British Post Office forwards letters to Canada by the first packet sailing after the letter is posted, unless the letters bear a special direction—"By Canadian Packet" or "By British Packet"—and in that case they are kept over for the Packet designated. "By Canadian Mail" is not a distinctive superscription; for any Mail for Canada is a "Canadian Mail," by whatever Packet forwarded.

REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be careful to require them to be registered, and to obtain from the Post Master a Certificate of receipt for registration.

The charge for Registration, in addition to the Postage, is as follows, viz. :

On Letters to any other place in Canada, or British North America ..	2 cents.
On Letters for the United States	5 "
On Letters for the United Kingdom	12½ "
On Letters for British Colonies or possessions sent via England	25 "

On Letters for France and other Foreign Countries, via England, an amount equal to the postage rate.

Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered letter.

MISCELLANEOUS CHARGES.

The charge on Parcels by the Parcel Post, which is limited to places within the Province, is 25 cents per lb. (with 5 cents additional if Registered.)

One cent per oz., payable in advance by Postage stamp, is the rate on Printed Circulars (Printed Circulars, if sent in envelopes, whether sealed or unsealed, are liable to letter postage.) Prices Current, Hand Bills, and other Printed matter of a like character and on Books, bound or unbound, when posted at a Canadian Post Office addressed to any place in Canada, British North America generally, or the United States.

The charge on Books, etc., by Book Post to England, is 7 cents on packets not exceeding 4 oz. in weight, 12½ cents on half lb. packets, and 12½ cents additional for every additional ½ lb. These charges must be prepaid. Photographs, provided they are not upon glass, or in cases containing glass, may be forwarded to England at the Book rate of postage;

BOOK POST WITH FRANCE.

For a Packet of Printed matter, or single Newspaper, Book, etc., not over 2 oz., 4 cts.	
Do. do. do. exceeding 2 oz. and not over 4 oz.	8 "
Do. do. do. " 4 " " 8 " 17 "	
Do. do. do. " 8 " " 1 lb.	34 "

And so on, increasing 17 cents for each additional ½ lb.

The Book Post regulations between Canada and England apply to matter between Canada and France.

NEWSPAPERS AND PERIODICALS.

Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, if paid quarterly in advance, by either the publisher at the post office where the papers are posted, or by the subscriber at the delivering post office :

For a paper published 6 times a week, 40 cents per quarter.	
" " 3 " " 20 " "	
" " 2 " " 13 " "	
" " 1 " " 6½ " "	

When the above rates are not paid in advance by either publisher or subscriber, such Papers are charged one cent each on delivery.

TRANSIENT NEWSPAPERS.

Transient Newspapers—That is to say, Canadian Newspapers posted otherwise than from the office of publication, and American or British Papers posted or re-posted in Canada, must be prepaid 1 cent each, by postage stamp, or they cannot be forwarded—except only British Newspapers distributed to regular subscribers by Canadian Booksellers or News Agents—such papers pass free as they would do if received in the Canadian Packet Mails.

NEWSPAPERS BY MAIL FROM ENGLAND OR UNITED STATES.

Newspapers received from England, by the Canadian Packet Mails, are delivered free.

Newspapers from England by the Cunard Packet Mails are charged 2 cents each on delivery. (This is the American transit charge.)
 United States Newspapers, brought by mail into Canada, are charged one cent each on delivery.

PERIODICAL PUBLICATIONS.

The rate on Periodical Publications is, if not exceeding 3 ounces in weight, 1 cent; over 3 ounces, 4 cents.

If prepaid by postage stamps from the office of publication, Periodicals published in Canada, weighing over 3 oz., may pass for 2 cents each.

Periodicals, printed in this Province, other than Newspapers, when specially devoted to the Education of Youth [both religious and general.] to Agriculture, to Temperance, or to any branch of science, and addressed directly from the office of publication, to be transmitted to any post office in this Province, are exempt from charge.

Transient Periodicals—including Canadian Periodicals not prepaid the committed rate from the office of publication—or exempted by the preceding clause, and all other Periodical publications posted in the Province, must be prepaid by stamp, the full rate, at the time of posting.

Periodicals received in Mails, from the United States, are charged with the rates named in the 1st clause of this section.

MONEY ORDERS.

Money Orders payable in the Province may be obtained at any Money Order Office at the following rates of commission :

Under and up to \$10	5 cents.
Over \$10 and not exceeding \$20	10 "
Do. 20 do. do. 30	15 "
Do. 30 do. do. 40	30 "
Do. 40 do. do. 60	45 "
Do. 60 do. do. 80	60 "
Do. 80 do. do. 100	75 "

N.B.—No half cents to be introduced in the Orders.

No single Order can be issued for more than \$200.

Money Orders, payable at any Money Order Office in Great Britain and Ireland, can be obtained at any Canadian Money Order Office. The Orders are drawn in Sterling, the commission chargeable being : for £2 and under, 25 cents; over £2 and up to £5, 50c.; over £5 and up to £7, 75c.; over £7 and up to £10, \$1. No order can be drawn for more than £10, but any number of orders of £10 each may be procured.

POSTAGE STAMPS.

Postage Stamps are provided for sale of the respective value of 1 cent for Newspapers; 5 cents for ordinary Provincial Letters; 10 cents for United States rate; 12½ cts. for Canadian Packet; and 17 cents for Cunard Packet.

Letter Envelopes are provided, impressed with medallion stamps, and equivalent to the prepayment of postage to the amount of 5 cents and 10 cents respectively.

The 5 cent envelopes will be sold to the public at the rate of \$5.50 per hundred, or 66 cents per dozen. The price of a single envelope is 6 cents.

The 10 cent envelopes will be sold at the rate of \$10.50 per hundred, or \$1.26 per dozen. Single envelopes 11 cts.

PENAL CLAUSES.

The Act contains the following penal clauses :—

To inclose a letter or letters, or any writing intended to serve the purpose of a letter in a Parcel posted for the Parcel Post, shall be a misdemeanor.

To inclose a letter or any writing, or to make any written marks to serve the purpose of a letter, or to inclose any other thing in a newspaper posted to pass as a newspaper, at the rate of postage applicable to newspapers, [except in the case of accounts and receipts of newspaper publishers, which are permitted to pass folded within the newspapers sent by them to their subscribers.] shall be a misdemeanor.

Believing we have been of some use in stimulating the manufacture of Potash, we reproduce here a circular issued in 1859 on that subject.

CIRCULAR ON THE POTASH TRADE.

HAMILTON, C. W., July, 1859.

In calling the attention of our friends in new settlements to the great importance of the Pot Ash Trade a branch of industry that has been much neglected, and which in these times when the wheat crops have become so very uncertain, might with little expense be much increased, and made to form a very advantageous auxiliary to the trade of the country—beneficial alike to Farmer and Merchant.

We would respectfully request your attention to the appended directions for the manufacture of Potash, which have been obtained from the inspectors of Ashes, as well as to suggest the use of the following precautions in shipping:—Each barrel should be properly and uniformly marked and numbered; our experience having taught us that, in cases where this has not been properly attended to, many awkward mistakes have occurred by barrels belonging to different owners getting mixed, and rendering it quite impossible for the agent at the place of sale to determine which belongs to one owner, and which to another.

The country storekeeper, in forwarding Potash to market, should stamp in a uniform manner his name and place of business in full, together with a running number on each barrel—thus:

JAMES DUNCAN.

CLAXTON—No. 5.

Then the initials of the Agent to whom he ships—thus:

W. L.

MONTREAL.

The number on the barrel would be an index to the maker of the Potash that he gets the actual returns of his own manufacture. It is also of importance to see that the forwarder's receipt has the names of the consigner and consignee, as well as the number of each barrel, written in full on the face of it. If these instructions are followed, the maker of No. 1 Potash need not fear getting his returns as No. 2 or No. 3.

General Instructions for the Manufacture of Potash.

The usual causes of inferiority in ashes are, in the first place, dirty leys, the leaching process not being sufficiently perfect, and the raw material, in many cases, being field ashes mixed with a large proportion of dirt.

The next cause is adulterating the ashes with lime, salt, sand, &c. Salt should in no case be used, and lime only in the leaches. On no account should stones, wood, raw ashes, lime, straw, or dirt, be put in to fill up a barrel.

The next cause is using weak leys. The last run of the leaches, when not able to float an egg or a potatoe, should never be boiled, but kept to wet the next leaches.

Another cause is bad barrels. Whisky barrels, and green or unseasoned casks, the wood of which contains moisture of any kind, will cause the ashes to deteriorate rapidly. White Oak and White Ash casks are much preferable, and Red Oak should never be used where it can be avoided. All should be well seasoned.

Ashes should be emptied by coolers, the barrel, two coolers being just sufficient to fill one barrel, and there should be as little packing of Potashes as possible, as the more they are broken the more rapidly they deteriorate by the action of the air. Ashes should never be packed hot into the barrel.

If the ashes have begun to melt before packing, the casks may be rubbed with dry slacked lime, to prevent farther melting; but lime or raw ashes should never be thrown loosely over them, as this injures the appearance, and must be separated in inspection.

Barrels should weigh at least 80 lbs., when thoroughly seasoned, and they should be accurately weighed, and that weight legibly marked on the barrel before packing. They should be packed quite full, and should be covered with solid round hoops to the extent of two-thirds of the barrel. The dimensions of the barrels should be 20 to 22 inches diameter of head, and 30 to 32 length of staves, larger or smaller being condemned by law. The mark should be quite legible in paint or ink, and only one plain mark and number should be on each; as when there are two or three marks there is more

ufacture of Potash, we re-
subject.

smaller being condemn-
and only one plain mark
ee marks there is more

liability of confusion. The mark should be the maker's or owner's name, and the name
of his place and residence, and a running number.

After packing, the barrels should be well coopered, with three shingle nails in the
end hoops to prevent the heads falling out, and put in a dry place where they will not
be exposed to moisture.

The grades by law established are first, second, and third sorts, and then unbranda-
ble Nos. 1, 2, 3, 4, and 5, each grade being an additional eighth of the selling price of
the First. Thus unbrandable No. 5 would have seven-eighths of the price of Firsts
deducted.

First Ashes should contain 77 per cent. of pure Alkali, at least.

Pearl Ashes cannot be manufactured except by persons who enter regularly into
the business, and who must consequently have all necessary knowledge.

We are, your most obedient servants,

KERR, BROWN & Co.

N.B.—We will be glad to ship and make returns for country merchants, free of
charge, thus giving them the advantage of economy in postage and freight.

KERR, BROWN & Co.

BUTTER.

This is an article in which all our customers have to deal to a greater or less extent, and one in which, from want of due care in handling it, we are persuaded a considerable amount of money is annually lost.

Believing that a little more attention might convert this into an almost sure source of profit, we beg to invite the special attention of our friends to the following hints on this subject :—

On receiving butter from the farmer, a separation should be made,—1st, as to quality ; 2nd, as to colour.

The inferior quality should be invariably packed separate, and a distinguishing mark put on the kegs ; as a few kegs of inferior will always damage the sale of a good lot if put into the market together.

The colour should likewise be packed separately, unless worked into each other until they become so thoroughly amalgamated, that when a butter tryer is put through the mass, no separate shade can be detected.

It is of the greatest importance that all the butter milk should be thoroughly worked out of the butter.

We recommend to our customers a machine, one of which can be seen at our warehouse. We have had it at work, and are satisfied it does the work of amalgamating the various colors, and extracting the butter milk most thoroughly. The cost is very trifling.

The only salt suitable for curing is the *ground Liverpool salt*, with a very little crushed sugar added. The *Onondago salt*, commonly used, is deficient in strength, and cannot preserve the butter many weeks. We would caution against using saltpetre. If the proper salt is used it is quite unnecessary.

The quantity of salt and sugar to be used must be left very much to the judgment of the packer, as there is already more or less salt in the butter when received from the farmer. When worked into a mass the taste will be a safe guide. The salt must be worked well *into* the butter, and not put in successive layers with the butter, as is too often done, and is very objectionable.

Until sufficient quantity to fill a keg has been accumulated, the butter should be put into pickle so as to be protected from the action of the atmosphere.

We strongly recommend the keg instead of the tub. The latter is quite unsuitable for shipping ; and butter is frequently unsaleable, simply because packed in tubs. The best style of keg is white ash, with round hickory hoops, but when these cannot be easily obtained, the flat black ash hoop will do. They should be of uniform shape and size, not to exceed twenty inches in length by thirteen inches diameter, top and bottom, outside measurement. This size of keg will hold 80 lbs., and butter packed in such will almost invariably command a half cent per lb. more than larger sizes. The dry tare ought to be cut by the cooper on the bottom of the keg, and the packer's name and residence should be branded with black paint very neatly, or burned on the top of the keg.

Before packing, the keg should be scalded out, and salt sprinkled on the inside freely. The butter should then be packed firmly down, and covered on the top with a piece of white cotton cloth, from which the dressing has been washed out, and this again covered with a good layer of salt before heading up the package.
